General guidelines

Report Style and Format

- **Font & Size:** Times New Roman or Arial, 12-pt font, double-spaced.
- **Margins:** 1.5" left; 1" top, right, bottom.
- **Page Numbers:** Bottom center for preliminary pages (roman numerals: i, ii, iii); Arabic numerals for main body (1, 2, 3 ...).
- **Figures & Tables:** Number sequentially, with captions (tables: title above; figures: caption below).
- **Referencing:** Use consistent in-text citation style (IEEE/APA).
- **Binding:** Final submission must be professionally bound or submitted as a single, well-formatted PDF.

Expected Length

- **Final Report:** ~40–60 pages (excluding appendices).
- **Abstract:** $\leq$ 1 page.
- **Chapters:** Each section should demonstrate depth and integration of Computer Science theory and practice (aligned with CLOs).

Acknowledgments

Optional section to acknowledge support.

Abstract

Brief summary of the problem, objectives, methodology, key findings, and impact (≤ 1 page).

Table of Contents

Auto-generated in final submission.

1. Introduction (Expected: 4 – 6 pages)

- Background and motivation
- Problem statement (aligned with CLO1)
- Research/practical gap and project objectives
- Significance and potential impact

2. Literature Review / Related Work (Expected: 7 – 10 pages)

- Summary of key academic and industry references
- Identification of gaps and opportunities for innovation

3. System Analysis and Design (Expected: 7 – 9 pages)

- Requirements analysis (functional & non-functional)
- System architecture, UML, use cases
- Feasibility and risk analysis (aligned with CLO2)

4. Implementation (Expected: 8 – 12 pages)

- Development methodology
- Tools, technologies, and frameworks
- Modules/components description
- Screenshots, flowcharts, or code snippets

5. Testing and Evaluation (Expected: 5 – 7 pages)

- Test plan and methodology
- Validation of requirements
- Experimental results or case studies
- Link to the GitHub code

6. Entrepreneurial / Innovation Aspects (Expected: 3 – 4 pages)

- Market/research relevance
- Commercialization or scalability
- Ethical and societal considerations

7. Project Management and Teamwork (Expected: 2 – 3 pages)

- Timeline and milestones
- Resource management

- Team roles

8. Results and Discussion (Expected: 4 – 6 pages)

- Comparison with objectives
- Strengths and limitations
- Contribution to research or practice

9. Conclusion and Future Work (Expected: 2 – 3 pages)

- Summary of contributions
- Future recommendations

References

Use IEEE or APA style consistently.

Appendices

Technical documentation, extended data, code listings, test cases, logs, or surveys.
